

Parents Responsibilities

Parents are urged to be sure that ALL forms provided are completed in order for your child to participate in the Farms For City Kids program.

The **Release and Consent** gives your child permission to be here at the farm, and to participate in the daily activities.

The **Photo Consent** gives permission for images and likeness of your child to be used in future brochures and printed material, and possibly on our web site.

Health History Form can be filled out by parent of Guardian. This forms gives us the essential health history of you child and making us aware of any important issues that there may be, such as allergies to food or asthma. This form is very important.

Health Exam Form needs to be completed by a Doctor or Nurse Practitioner, or Physician's Assistant. This gives us a base line physical exam, and will be needed in case of an emergency doctor's visit while at the farm.

Medication Form brings to our attention any medication that your child will be taking while at the farm. This form will also serve as permission for your child to receive medication as indicated by you the guardian. We will call and notify you if your child is not feeling well.

Please make sure that any medicine that you child may be taking is in the original container, and that there is enough to last the entire week at the farm.

Phone calls to your child are highly discouraged. It is will our experience that phone calls increase homesickness, particularly in children who do not receive calls from home. If you call and leave a message we will pass the message along to your child.
